

Test Summary Report

Project Information

Project Name: OrangeHRM - Add Employee Functionality Testing

Application URL: <https://opensource-demo.orangehrmlive.com/>

Test Date: January 24, 2026

Tester Name: Oshini Poornima

Test Environment: Chrome Browser (Version 144.0.7559.97), Windows

Test Execution Summary

Total Test Cases Written: 5

Total Test Cases Executed: 5

Total Test Cases Passed: 5

Total Test Cases Failed: 0

Pass Percentage: 100%

Test Scope

This test cycle focused on the core employee management functionality, specifically:

- User login (valid and invalid credentials)
- Navigation to Add Employee page
- Adding a new employee with complete information
- Form validation with missing required fields

Test Results Details

TC-01 | Verify user can login with valid credentials | Pass
TC-02 | Verify user cannot login with invalid password | Pass
TC-03 | Verify user can navigate to Add Employee page | Pass
TC-04 | Verify user can successfully add a new employee | Pass
TC-05 | Verify system shows error when First Name is empty | Pass

Defects Found

No defects were identified during this test cycle. All functionality worked as expected.

Key Observations

1. Login validation is working correctly - the system properly rejects invalid credentials.
2. Form validation is implemented properly - the system prevents saving incomplete employee records.
3. The Employee ID auto-generation feature works smoothly.
4. Navigation flow from Dashboard → PIM → Add Employee is intuitive and functional.
5. Success feedback is clear - users are redirected to Personal Details page after successful save.

Recommendations

Based on the test results, the Add Employee functionality is stable and ready for production use. All critical paths tested successfully with 100% pass rate.

Recommendation: APPROVE for release.

However, for comprehensive coverage, the following additional testing is recommended:

- API testing of employee creation endpoints
- Mobile responsiveness testing

- Performance testing with bulk employee additions
- Exploratory testing of edge cases

Test Artifacts

The following artifacts are available in the project repository:

- Manual Test Cases (Google Sheets) - 5 test cases documented
- Test Summary Report (This document)
- Screenshots of test execution (for key test cases)
- Bug Reports: None (No defects found during this test cycle)

Test Sign-off

Prepared by: Oshini Poornima

Date: January 24, 2026

Status: Testing Complete - All Tests Passed
